

Three phase power-meter

Three phase power-meter

| | |
|---------------|---------------------|
| Model number: | PM3-I-D |
| Mounting: | DIN rail, 3M, 53 mm |
| Dimensions: | 53 × 84 × 66 mm |

| | |
|---|------------------------------|
| Used for measuring power and energy of | |
| ✓ | three-phase energy sources |
| ✓ | three-phase energy consumers |

Applications

- Digital multi-function energy meter for or 3-phase sources or consumers

Features

- Three phase direct connection up to 80 A
- Serial RS485 communication
- Display LCD 7+1 digit
- Multi-functional front LED

General description

The PM-3-IQ is intended for energy measurements in three-phase electrical power network and can be used in residential, industrial and utility applications. Meter measures energy directly in 4-wire networks according to the principle of fast sampling of voltage and current signals.

Connecting terminals can be sealed up against non-authorized access with protection covers. They are built to be fastened according to EN 60715 standard. Meter has built-in RS485 serial communication with the MOD-BUS protocol which enables data transmission and thus connection of

the measuring places into the network for the control and management with energy.

Technical specifications
