

# Opening sensor

## MOS-01

## MOS-02

## Features

- Normally closed type: when the magnet is close to switch, the contacts are closed.
- Sensor is a reed switch, operated by an applied magnetic field.
- Designed for use with HIQ systems.

## Specifications

|        |                         |
|--------|-------------------------|
| Type:  | Magnetic Opening Sensor |
| Model: | MOS-01                  |

|                     |                                |
|---------------------|--------------------------------|
| Material:           | ABS                            |
| Color:              | White                          |
| Size:               | 62×2mm                         |
| Rated current:      | 100mA                          |
| Rated power:        | 3W                             |
| Connecting mode:    | NC. (normally closed)          |
| Operating distance: | more than 15mm, less than 25mm |
