

Robotina Charger Introduction

PLUG IN & GO

Simply connect vehicle to charge and unplug to drive.

Robotina Charger makes charging as easy possible by enabling of charging using button on household or by app on cloud.

BUTTON & LED on household

- Charging starts automatically as soon as vehicle is connected with power cable.
- Press button to stop charging, press again to restart
- Press and hold button to activate priority charging
- LED light indicates charging status.
- There is no need to have active application to operate with button.

**Button and button on cloud app share same functionality. It doesn't matter which one is used.*

RFID or QR

- authentication for users
- charging starts after authentication is successfully
- RFID or QR reader could be installed on household, both is not possible.

LOCKED

- disable unauthorized use of charging station
- locked is deactivated by authorized RFID card, key fob or by cloud application

ECONOMY CHARGING

- allows charging with a current set by user
- charging only at low tariff is available (depending on table set by user)
- or charging by surplus energy only or in combination with grid power

PRIORITY CHARGING

- Utilize all available power to charge as fast as possible
- In case of *Dynamic load balancing* temporary suspends high-power loads to increase available power for charging simultaneously keeping total power below max allowed power
