Access Code management

1	Edited code	State Configuration
Click to enter the cod	le you want to edit.	Mark cate and section of Conference of Confe
2	Code type	
Click to select edited (unlimited).	code type. Options ate L1 (level 1), L2 (level 2)	or UL
3	Access point limits	
Click to enter count li	imits for each access point.	
If SG3 is the only acc	ess point in the local network, enter only in pos	ition
00 (upper left field). E unlimited.	Enter the allowed number of entries or 255 for	
4	Code activation date	
Set code activation dimmediately.	ate and time. Set all to 0 for the code that is ac	tive
8	Code expiration date	
Set code expiration d validity limit.	late and time. Set all to 0 for a code that has no)
6	Edit code commands	

1	Edited code	
[search] = Find settings for "edit code".		
[save] = Saves the code being edited with all settings.		
[clear] = Clear all edit settings.		
[delete] = Delete edit code from the list.		
7 Codes list		
List of access codes on the controller. Clicking on the code picks up all the code values in the edit fields above.		

Settings

1	Entry conditions	
Count limits: set count limits	for L1 and L2; 0=not limited	
Disinfection: select if hand disinfection is required		
Thermal scan: select if body	temperature scan is required s	
Reader: select if code reade	r is required	
Confirmation: select if confir	mation is required	
2	Entry detection settings	
Entry detection type: select	entry detection type	
Entry time-out: max time be	tween consecutive steps	
Confirmation time-out: max	time allowed for confirmation	
Block time-out: time for hi to	emperature or wrong code alert	
After all time-outs entry pro	cedure restarts.	
3	Code reader settings	
Access point ID: ID for built bigger Access control syster	in access point. Used when S Gate is part of m, if not, leave 0.	
Thermal scan timeout: set the temperature scan for the co	ne time for which the system remembers the de user	
Access master code: set the	code for local codes management	
Send LAN code query: set to controllers on LAN	enable sending code queries to other access	
Process LAN code query: set LAN	to process queries from other controllers on	
4	Auxiliary input settings	
AUX input type: set auxiliary button	input function to presence sensor or to call	
Presence / Call time-out: aux	x function timeout	
5	Gates settings	
Entry gate time-out: set entry gate signal timeout, 0=no entry gate		
Exit gate time-out: set exit gate signal timeout, 0=no exit gate		
6	Alarm settings	
Alarm duration: alarm active	e duration time	
Alarm beeper enabled: set to enable continuous beep during alarm		
Reset alarm on exit: set to reset alarm when exit is detected		
7	Hardware overview	
Control system overview		

1	Entry conditions	
Select [Autodetect] to find S Gate controller in LAN (when red Xes		
are displayed)		
8	Wireless devices management	
[]wireless management: set	to enable management of wireless devices	
first icon: wireless device paired status (x=none, ✓=paired)		
second icon: displaying wireless signal strength		
third icon: wireless device operating as repeater (click to enable).		
[-]: delete wireless device		
[+]: add wireless device		
9 Controller date and time settings		
set S Gate controller date and time.		
10	Parameters management	
<pre>[init parameters]: initialize all parameters to factory default values</pre>		
[save parameters]: save all parameters to permanent memory		
[read parameters]: read all parameters from permanent memory		

User interfaces settings
