

Typical installations

Small shop, pharmacy

Requirements

- limited number of visitors
- one passage for access and exit
- automatic door
- required temperature measurement
- required disinfection

Installation

- SGate is installed at the entrance from the outside of the automatic door.
- Entry detection sensors are mounted on one of the sides or on an additional carrier depending on the physical layout of the SGate relative to the door..
- The automatic door opening signal is connected to the SGate and in parallel to the internal automatic opening sensor.
- The staff has a wireless button to confirm alarms or to open the door manually in case of exceptions.

Settings

Department store

Requirements

- limited number of visitors
- one-way entrance with swing gate
- separate exit
- required temperature measurement
- required disinfection
- staff can access it by scanning the code even when the count limit 1 is exceeded
- staff do not need to scan the temperature 4 hours after a successful scan
- hand disinfection is not mandatory for employees

Installation

- SGate is installed at the entrance from the outside of the swing gate.
- Entry detection sensor is mounted on side of SGate or on an additional carrier depending on the physical layout of the SGate relative to the gate.
- Security guard has a wireless button to confirm alarms or to open the door manually in case of exceptions.
